Reporting Period

01 Jun(01 Oct - 31 Mar)

Remark(if any)

EC Compliance Report of Integrated Cement Plant and Mukutban lime stone mines. Single EC has been issued for Integrated Cement Plant and Mines . Total area of Cement plant is 173.8Ha and entire land under possession . Total Mine lease area is 572.17 Ha , Out of which 467.45 Ha area is Forest land and 104 .72 Ha land is non-forest land . Our Mines Was Commissioned 22.12.2021 and Plant was Commissioned 28.03.2022.

Details of Production and Project Area**Date of Commencement of Project/Activity**

Conditions

Specific Conditions

Sr.No.	Condition Heading	Condition Details	Status of Compliance, Remarks / Reason and Supporting Documents	
1	MINING PLAN	No construction activity at the project site shall be initiated till the Stage-II forestry clearance for diversion of 467.45 ha of forest land is obtained under the forest (Conservation) Act 1980.	PPs Submission	Complied, Stage II Forest Clearance obtained on 12th Sept, 2017 vide Letter No: F.No.8-28/2012-FC for diversion of 467.45 Ha land. Complied 28-05-2026 Attachment: Click to View
2	AIR QUALITY MONITORING AND PRESERVATION	Continuous monitoring system to monitor gaseous emissions shall be provided and limit of PM should be controlled within 50 mg/Nm3 by installing	PPs Submission	Compliance assured, Compensation paid based on mutual agreement for direct purchase of land and assets prescribed under National

		adequate air pollution control system and energy efficient technology.		Resettlement and Rehabilitation Policy, 2007. Complied 14-05-2026 Attachment:NA
3	ENERGY PRESERVATION MEASURES	Possibilities shall be explored for the proper and full utilization of gases generated from the kiln in waste heat recovery boiler (WHRB) and a feasibility report should be prepared and submitted to the Ministry and its Regional Office at Bhopal within 3 months from the date of issue of the letter.	PPs Submission	Complied, we have installed 08 MW Waste heat recovery power plant to ensure full utilization of waste heat generated from the kiln. Complied 14-05-2026 Attachment:NA

4	AIR QUALITY MONITORING AND PRESERVATION	Secondary fugitive emissions from all the sources shall be controlled within the latest permissible limits issued by the Ministry and regularly monitored. Guidelines / Code of practice issued by the CPCB shall be followed.	PPs Submission	Complied, we have installed more-than 100 bag filters at all transfer points of conveyor belts start from crusher to stacker re-claimer to packing plant to ensure control of fugitive dust emission. Apart from that, we have also fully covered the entire conveyor belts to eliminate the chances of secondary fugitive emission. The water sprinkling is being done on regular basis on the roads to suppress the fugitive dust emission. The guideline/code of practice issued by CPCB is being followed to suppress the fugitive emissions. Complied 28-05-2026 Attachment: Click to View
5	AIR QUALITY MONITORING AND PRESERVATION	Asphalting/concreting of roads and water spray all around the critical areas prone to air pollution and having high levels of SPM and RPM should be ensured.	PPs Submission	Complied, most of the internal roads are concreated and mechanized sweeping is being done to avoid air pollution. Water Spraying is being done at all around the critical areas are ensured. Complied 28-05-2026 Attachment: Click to View
6	AIR QUALITY MONITORING AND PRESERVATION	Efforts should be made to reduce impact of the transport of the raw materials and end products on the surrounding	PPs Submission	Complied, Covered vehicles are being used for transportation of raw materials and finished products. Fly ash is

		environment including agriculture land. All the raw materials including fly ash should be transported in the closed containers only and should not be overloaded. Vehicular emissions shall be regularly monitored.		being transported through closed bulkers only, Cement is being transported through bulkers / covered trucks only. PUC certified vehicles allowed to enter the plant for transportation of raw materials and finished product. Complied 28-05-2026 Attachment:NA
7	WATER QUALITY MONITORING AND PRESERVATION	Total water requirement for the proposed expansion shall not exceed 2750 cu meter/day. Rainwater harvesting measures should be adopted for the augmentation of ground water at cement plant, colony and mine site. The company must also collect rain water in the mined out pits of captive lime stone mine and use the same water for the various activities of the project to conserve fresh water and reduce the water requirement pressure from the river. An action plan should be submitted to Ministry's Regional Office at Bhopal within 3 months from the date of issue of this letter.	PPs Submission	Complied, Permission from CGWA is obtained for ground water withdrawal. CGWA has recommended renewal of the CGWA NOC for Mines for a quantity of 1121 KLD and for Plant for 2270 KLD vide email dated 15.07.2025. The Plant NOC has been received and is enclosed herewith. The Mines NOC has been approved; however, the copy of the NOC is still awaited. A pond is constructed in the plant area for rain water harvesting and for augmentation of ground water. A pit sump is developed in mine area as per mining plan approved by Indian Bureau of Mines, to recharge the ground water. An action plan for Rain water harvesting is prepared and submitted vide Letter Ref. No. RCC/Env/Mukutban/EC/01 dated 15th May 2013. Enclosed Annexure 1. Complied 28-05-2026 Attachment: Click to View

8	WATER QUALITY MONITORING AND PRESERVATION	The project proponent shall ensure that no natural water course shall be obstructed due to any mining operations	PPs Submission	Complied, No water course is being obstructed due to mining operation. Complied 14-05-2026 Attachment:NA
9	WATER QUALITY MONITORING AND PRESERVATION	Catch drains and siltation ponds of appropriate size shall be constructed for the working pit, interburden and minerals dumps to arrest flow of silt and sediment. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted, particularly after monsoon, and maintained properly.	PPs Submission	Complied, Catch drains and siltation pond of size 55 x40 x 5.5 m are developed in the mines. Garland drain of adequate gradient and length of 4715m is constructed in the mines, along with strong embankment. The Garland drain, silt arrestor and siltation pond are being desilted and cleanliness maintained regularly. Complied 28-05-2026 Attachment: Click to View
10	WATER QUALITY MONITORING AND PRESERVATION	Garland Drain of appropriate size, gradient and length shall be constructed for both mine pit and inter burden dumps and sump capacity should be designed keeping 50 Percent safety margin over and above peak sudden rainfall (based on 50 years data) and maximum discharge in the area adjoining the mine site. Sump capacity should also be provided adequate retention period to allow proper settling of silt material. Sedimentation pits should be constructed at the	PPs Submission	Complied, Garland drain of adequate gradient and length of 4715 m is constructed in the mines, along with strong embankment. Further mine pit development is under progress. Siltation pond of size 55 x 40 x 5.5 m is also constructed in the mine lease area. Complied 28-05-2026 Attachment: Click to View

		corners of the garland drains and desilted at regular intervals.		
11	WATER QUALITY MONITORING AND PRESERVATION	Regular monitoring of ground water level and quality should be carried out by the establishing a network of existing wells and constructing new piezometers at suitable locations by the project proponent in and around project area in consultation with Regional Director, central ground water board. The frequency of monitoring should be four times a year pre-monsoon (April/May), monsoon (August), Post-monsoon (November) and winter (January). Data thus collected shall be sent at regular intervals to Ministry of Environment and forest and its Regional Office at Bhopal, Central Ground Water Authority and State Ground Water Board.	PPs Submission	Complied, Regular monitoring of ground water quality is being done through NABL accredited lab on quarterly basis and the reports are being submitted to MPCB/MOEF on regular basis. The Piezometer with telemetry system is installed at plant and mine site to monitor the ground water level and the data is being transferred to the server on real time basis. Complied 28-05-2026 Attachment: Click to View
12	WATER QUALITY MONITORING AND PRESERVATION	Dimension of the retaining wall at the toe of inter burden dumps and inter burden benches within the mine to check run-off and siltation should be based on the rain fall data.	PPs Submission	Complied, Retaining wall of 2171m length constructed in the toe/periphery of top soil dump to check run-off. Complied 28-05-2026 Attachment: Click to View
13	WATER QUALITY MONITORING AND PRESERVATION	Suitable conservation measures to augment ground water resources in the area should be planned and implemented in	PPs Submission	Complied, conservation measures are being adopted as per hydrogeological report.

		consultation with Regional Director, Central Ground Water Board.		Complied 14-05-2026 Attachment:NA
14	WASTE MANAGEMENT	Proper utilization of fly ash shall be ensured as per Fly ash Notification, 1999 and subsequent amendment in 2003 and 2010. All the fly ash should be provided to cement and brick manufacturers for further utilization and Memorandum of Understanding should be submitted to the Ministry Regional Office at Bhopal.	PPs Submission	Complied, captive power plant is located adjacent to the integrated cement plant 100 percent fly ash is being utilized for cement manufacturing. Complied 14-05-2026 Attachment:NA
15	WASTE MANAGEMENT	All the bag filter dust, raw meal dust, coal dust, clinker dust and cement dust from pollution control devices shall be recycled and reused in the process and used for cement manufacturing.	PPs Submission	Complied, all the dust generated from air pollution control equipment is being transported through pneumatic conveying system and 100 percentage utilizing for clinker manufacturing. All the fine dust including bag filter dust, raw meal dust, coal dust, clinker dust and cement dust is recycled and reused in cement making. Complied 14-05-2026 Attachment:NA

16	WASTE MANAGEMENT	An effort shall be made to use of high calorific hazardous waste in the cement kiln and necessary provision shall be made accordingly.	PPs Submission	Provision for feeding hazardous waste in the kiln will be made to use high calorific hazardous wastes generated nearby areas. Agreed to Comply 28-05-2026 Attachment:NA
17	WASTE MANAGEMENT	Efforts shall be made to use low grade lime, more fly ash and solid waste in the cement manufacturing	PPs Submission	In order to achieve optimum utilization of natural resources, we will use low grade lime and other alternatives available nearby. Also hazardous and non-hazardous wastes will be utilized in the cement plant as per the rules/provisions of government. Complied 14-05-2026 Attachment:NA
18	Risk Mitigation and Disaster Management	A Risk and Disaster management plan along with the mitigation measures should be prepared and a copy submitted to the Ministry Regional Office at Bhopal. SPCB and CPCB within 3 months of issue of environment clearance letter.	PPs Submission	Complied, Risk and Disaster management plan along with mitigation measures is prepared and submitted vide letter No. RCC/Env/Mukutban/EC/02 dated 15th May 2013. Complied 14-05-2026 Attachment:NA
19	MINING PLAN	Blasting operation shall be carried out only during the day time. Controlled blasting should be practiced. The mitigative measures for control of ground vibrations and to arrest fly rocks and	PPs Submission	Complied, Blasting is carried out only during the day time. Controlled blasting with NONEL is being practiced by taking all mitigative measures. Vibration study is also being carried out

		boulders should be implemented.		during the blasting. Complied 28-05-2026 Attachment: Click to View
20	AIR QUALITY MONITORING AND PRESERVATION	Wet drilling with provision for the control of air emissions shall be used.	PPs Submission	Complied, wet drilling machine is being used for drilling to ensure control of air emission during drilling activity. Complied 28-05-2026 Attachment: Click to View
21	MINING PLAN	Bench height, width and slope for individual bench should be properly assessed and implemented. Adequate measures should be adopted to stabilize the slope before abandonment. The fencing around the reservoir shall be provided to prevent accidents	PPs Submission	Compliance assured, Bench height, width and slope of individual bench are implemented as per approved Mining Plan. Slopes will be stabilized before abandonment. Fencing is being provided around the reservoir to prevent any accidents. Complied 14-05-2026 Attachment:NA
22	MINING PLAN	Action plan for the mining, management of overburden (removal, storage, disposal etc), reclamation of the mined out area and mine closure shall be submitted to the Ministry and its Regional Office at Bhopal.	PPs Submission	Complied, Mine development and management is being done as per the IBM approved Mining Plan and copy of the mining plan is already submitted to MoEF. Complied 28-05-2026 Attachment: Click to View
23	MINING PLAN	The interburden and other waste generated should be stacked at earmarked dump site(s) only and	PPs Submission	Complied, OB/soil dump is being stacked separately with proper mitigative measures

		should not be kept active for long period. The total height of the dumps should not exceed 30 m in three terraces of 10 M each and the overall slope of the dump should be maintained to 28 deg. The inter burden dumps should be scientifically Vegetated with suitable native species to prevent erosion and surface run off. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self sustaining. Compliance status should be submitted to the Ministry of Environment Forest and its Regional Office, Bhopal on six monthly basis.		like development of retaining wall at the designated place. Vegetation is being done in the dumps with native species. The height and slope parameters are being maintained as per the norms. It will be ensured that the total height of the dumps will not exceed 30 m in three terraces of 10 M each and the overall slope of the dump shall be maintained to 28 deg. The compliance status is being send to MoEF CC on six monthly basis. Complied 28-05-2026 Attachment: Click to View	
24	MINING PLAN	The project proponent shall modify the mine plan of the project at the time of seeking approval for the next mining scheme from the Indian Bureau of Mines so as to reduce the area for external over burden dump by suitably increasing the height of the dumps with proper terracing. It should be ensured that the overall slope of the dump does not exceed 28deg.	PPs Submission	Compliance assured. The mine plan has been modified. However, there are no overburden dump outside lease area. The overall slope of the dump, which are within ML, does not exceed 28 deg. Complied 28-05-2026 Attachment:NA	
25	MINING PLAN	The void left unfilled in the mining area shall be converted into water body. The higher benches of excavated void/mining pit	PPs Submission	Noted. However, the mined out pits left after back filling will be converted in to water bodies as per IBM approved Mining	

		should be terraced and plantation done to stabilize the slopes. The slope of higher benches should be made gentler for easy accessibility by local people to use the water body. Peripheral fencing shall be carried out along the excavated area.		plan and accordingly plantation will also be done on the higher benches of excavated mining pits to stabilize the slopes, as mine is in progressive stage. Being Complied 28-05-2026 Attachment:NA
26	MINING PLAN	Top soil, if any shall be stacked with proper slope at earmarked sites only with adequate measures and should be used for reclamation and rehabilitation of mined out areas.	PPs Submission	Complied, Top soil properly stacked separately maintaining proper slope and with adequate measures. This will be used to cover back filled area of mined out pit and plantation will be done on the back filled areas as per approved mining plan Complied 28-05-2026 Attachment:NA
27	GREENBELT	As proposed green belt shall be developed in at least 33 percent in cement plant and all the mined out area except used for reservoir.	PPs Submission	Complied, plantation developed in 33 Percentage area in cement plant area. In Mines plantation is being done as per approved mine plan in safety zone and other areas. Complied 14-05-2026 Attachment:NA

28	Statutory compliance	All the safety norms stipulated by the Director General, Mine Safety (DGMS) should be implemented.	PPs Submission	Complied, All the safety norms stipulated by Director General, Mine and Safety (DGMS) is being implemented. Complied 14-05-2026 Attachment:NA
29	Corporate Environmental Responsibility	All the recommendations made in the Chapter on Corporate Responsibility for Environment Protection (CREP) for the Cement plants should be implemented.	PPs Submission	Complied, The recommendations made in the Chapter on Corporate Responsibility for Environment Protection (CREP) for the Cement plants which are applicable as on date are being implemented. Complied 14-05-2026 Attachment:NA
30	Corporate Environmental Responsibility	The company shall adopt well laid down corporate environment policy and identified and designate responsible officers to all levels of its hierarchy for ensuring adherence to the policy and compliance with environmental clearance, environmental laws and regulations.	PPs Submission	Complied, We have a well laid down Environment policy. We have also designated officers at all levels of hierarchy for ensuring the compliance of EC, Environmental laws and regulations. Complied 28-05-2026 Attachment: Click to View
31	PUBLIC HEARING	The company shall comply with the commitments made during public hearing held on 14th October, 2010 and a separate budget for implementing the same should be allocated and information submitted to the	PPs Submission	Compliance assured, The commitments made by company during public hearing are being implemented through our CSR activities for which we have a dedicated CSR team who performs various activities in the nearby

		Ministry Regional Office at Bhopal. Implementation of such program should be ensured accordingly in a time bound manner.		villages including Social and Livelihood Support, Infrastructure development, support to health and medical services, educational support etc. Complied 28-05-2026 Attachment: Click to View	
32	Corporate Environmental Responsibility	At least 5 Percent of the total cost of the project should be earmarked towards the corporate social responsibility and item-wise details along with time bound action plan should be prepared and submitted to the Ministry Regional Office at Bhopal. Implementation of such program should be ensured accordingly in a time bound manner.	PPs Submission	We have a dedicated CSR team who performs various activities in the nearby villages including Social and Livelihood Support, Infrastructure development, support to health and medical services, educational support etc. Separate fund is earmarked for CSR activities which is utilized for the upliftment of nearby villages. Being Complied 14-05-2026 Attachment:NA	
33	MINING PLAN	Compensation to the land oustees shall be provided as per the National Resettlement and Rehabilitation Policy, 2007 and as per the State Government Policy, in consultation with the State Government of Maharashtra. Compensation paid in any case shall not be less than the norms prescribed under National Resettlement and Rehabilitation Policy, 2007.	PPs Submission	Compliance assured, Compensation paid based on mutual agreement for direct purchase of land and assets prescribed under National Resettlement and Rehabilitation Policy, 2007. Complied 14-05-2026 Attachment:NA	

General Conditions

Sr.No.	Condition Heading	Condition Details	Status of Compliance,Remarks / Reason and Supporting Documents	
1	Statutory compliance	The project authorities must strictly adhere to the stipulations made by the Maharashtra pollution Control Board and the State Government.	PPs Submission	Noted Complied 14-05-2026 Attachment:NA
2	Statutory compliance	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment and forests.	PPs Submission	Noted Complied 14-05-2026 Attachment:NA
3	AIR QUALITY MONITORING AND PRESERVATION	The National Ambient Air Quality Emission Standards issued by the Ministry vide G.S.R No. 826(E) dated 16th November, 2009 should be followed.	PPs Submission	Complied, We are strictly following the National Ambient Air Quality Emission Standards issued by the Ministry vide G.S.R No. 826(E) dated 16th November, 2009. Complied 15-05-2026 Attachment:NA
4	AIR QUALITY MONITORING AND PRESERVATION	The gaseous emissions from various process units shall confirm to the load/mass based standards notified by this Ministry on 19th May, 1993 and standards prescribed from time to time. The State Pollution Control Board may specify more stringent standards for the relevant parameters keeping in view the nature of the industry and its size and location.	PPs Submission	Complied, all the gaseous emissions norms are being maintained as per the standards. Complied 15-05-2026 Attachment:NA

5	AIR QUALITY MONITORING AND PRESERVATION	At least four ambient air quality monitoring stations should be established in the downward directions as well as where maximum ground level concentration of PM10, SO2 and NOx are anticipated in consultation with the SPCB. Data on ambient air quality and stack emission shall be regularly submitted to this Ministry including the Regional Office at Bhopal and the SPCB/CPCB once in six months.	PPs Submission	Complied, We have installed 05 Nos CAAQMS at Plant (02 Nos) and Mines (03 Nos) site and Connected with CPCB/SPCB Server. We have also engaged NABL approved lab for monitoring of all environmental parameter within the plant as well as surrounding areas. Monitoring reports are regularly submitted to all concern offices. Complied 28-05-2026 Attachment: Click to View
6	Noise Monitoring & Prevention	The overall noise levels in and around the plant area shall be kept well within the standards (85 dBA) by providing noise control measures including acoustic hoods, silencers, enclosures etc on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under EPA rules, 1989 viz 75 dBA (daytime) and 70 dBA (night time).	PPs Submission	Complied, The ambient noise monitoring is being conducted through NABL approved lab and the results are within the stipulated standards of CPCB/SPCB. Copy of the latest monitoring report is attached . Adequate measures are being implemented to control noise from its own source within the premises so as to maintain ambient noise within stipulated standards.

				Complied 28-05-2026 Attachment: Click to View
7	Human Health Environment	Occupational health surveillance of the workers should be done on a regular basis and records maintained as per the Factories Act.	PPs Submission	Complied, Annual health checkup is being done and records are maintained as per Factories Act. Complied 28-05-2026 Attachment: Click to View
8	WATER QUALITY MONITORING AND PRESERVATION	The company shall develop surface water harvesting structures to harvest the rain water for utilization in the lean season besides recharging the ground water table.	PPs Submission	Complied, Roof top rain water harvesting structures adopted at plant area and pond is also constructed for rain water harvesting and for augmentation of ground water. Complied 28-05-2026 Attachment: Click to View
9	Corporate Environmental Responsibility	The project proponent shall also comply with all the environmental protection measures and safeguards recommended in the EIA/EMP report. Further, the company must undertake socio-economic development activities in the surrounding villages like community development program, educational program, drinking water supply and health care etc.	PPs Submission	The Environmental protection measures has been implemented. We have a dedicated CSR team who performs various activities in the nearby villages including Social and Livelihood Support, Infrastructure

				development, support to health and medical services, educational support etc. Complied 15-05-2026 Attachment:NA
10	MISCELLANEOUS	Requisite amount shall be earmarked towards capital cost and recurring cost/annum for environment pollution control measures to implement the conditions stipulated by the Ministry of Environment and Forest as well as the State Government. An implementation schedule for implementing all the conditions stipulated herein shall be submitted to the Regional Office at Bhopal. The funds so provided shall not be diverted for any other purpose.	PPs Submission	Complied. Complied 15-05-2026 Attachment:NA
11	MISCELLANEOUS	A copy of clearance letter shall be sent by the proponent to concerned Panchayat, Zillah Parishad/Municipal Corporation, Urban Local Body and the local NGO, if any, from whom suggestions/representation, if any were received while processing the proposal. The clearance letter shall also be put on the website of the company by the project proponent.	PPs Submission	Complied. Complied 15-05-2026 Attachment:NA
12	Statutory compliance	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously sent to	PPs Submission	The compliance of environmental clearance along with environmental monitored data is being uploaded in Parivesh Portal

		the Regional Office of the MOEF at Bhopal. The respective Zonal Office of CPCB and the SPCB. The criteria pollutant levels namely; PM10, SO2, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects shall be monitored and displayed at a convenient location near the main gate of the company in the public Domain.		and also forward to SPCB and CPCB on six monthly basis. The pollutants measured are PM 2.5, PM 10, SO2, NOx CO and all parameters are displayed at Main gate of the Company. Complied 28-05-2026 Attachment: Click to View
13	Statutory compliance	The project proponent shall also submit six monthly reports on the status of the compliance of the stipulated environmental conditions including results of monitored data (both in hard copies as well as by e-mail) to the Regional Office of this Ministry at Bhopal/CPCB/SPCB shall monitor the stipulated conditions.	PPs Submission	The compliance of environmental clearance along with environmental monitored data is being uploaded in Parivesh Portal and also forward to SPCB and CPCB on six monthly basis. Complied 28-05-2026 Attachment:NA
14	Statutory compliance	The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental conditions and shall also be sent to the respective Regional	PPs Submission	Complied. Environmental Statement in prescribed format is being submitted to all concern offices as per schedule. Complied 28-05-2026 Attachment:NA

		Office of the MOEF at Bhopal by e-mail.		
15	MISCELLANEOUS	The project Proponent shall inform the public that the project has been accorded environmental clearance by the ministry and copies of the clearance letter are available with the SPCB and may also be seen at website of the ministry of Environment and forests at http://envfor.nic.in . This shall be advertised within seven days from the date of issue of the clearance letter, at least in two local newspapers that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same should be forwarded to the Regional office at Bhopal.	PPs Submission	Complied, Complied 28-05-2026 Attachment:NA
16	MISCELLANEOUS	Project authorities shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities and the date of commencing the land development work.	PPs Submission	Mine development work started from 11th June, 2018 and plant Construction work commenced from January, 2019. Complied 28-05-2026 Attachment:NA
